

# THREE REASONS TO OPTIMISE YOUR DIGITAL WORKPLACE WITH COMPUTACENTER AND HP

## FIND OUT HOW TO MAXIMISE PRODUCTIVITY AND MEET YOUR FINANCIAL GOALS

New modes of working, greater security risks and intense competition are just some of the challenges driving today's IT transformations. Against this backdrop of continuous change, organisations need to ensure they can continue to meet user's IT needs as they evolve, while controlling costs.

Computacenter and HP have worked together for more than 40 years to help organisations accelerate change, maximise user productivity and reduce costs. "Computacenter's end-to-end services combined with HP's innovative, reliable and flexible technologies enable organisations to meet the needs of distributed workforces," comments Adam Levy, Director of Workplace and End User Solutions at Computacenter.

Together, Computacenter and HP help organisations protect data and systems with secure devices and processes. Automated workflows and remote control help simplify IT management. Optimised investments reduce costs. And best-fit technologies and services enhance employee experiences.

**Working with Computacenter and HP, organisations can:**

1

## ENJOY A SEAMLESS ENGAGEMENT WITH OUR GLOBAL ECOSYSTEM OF FACILITIES AND PARTNERS

Computacenter sources, deploys and manages HP technologies on a global scale across the entire HP portfolio, including user devices, meeting room equipment and printers. We have the ability to deliver thousands of HP devices on a daily basis from the Hatfield Configuration Center in the UK and our International Integration Centers.

The Computacenter and HP partnership has been built around a common goal of putting customer needs first. "With more than \$2.5 billion transacted from the Computacenter and HP partnership since they started to work together, the two companies have a long history of collaborating at every level, which enables a seamless experience for customers," comments Levy. "Plus, the strength of Computacenter's relationships with other key partners, such as Poly, Microsoft, Google, Intel and AMD means that organisations can benefit from working with a connected ecosystem of trusted suppliers."

2

## MAXIMISE USER PRODUCTIVITY AND SATISFACTION WITH BEST-FIT DEVICES AND RAPID DEPLOYMENT

Our advisory services include workstyle and meeting room assessments and product benchmarking, so organisations can ensure they have the most suitable HP and Poly solutions for their needs. User experience workshops translate business needs to IT requirements.

When it's time to upgrade legacy devices and operating systems, Computacenter's experience in workplace transformations helps organisations reduce risk and cost. We offer advice, planning and implementation services for Windows 11 migrations. "To equip or upgrade technologies for employees that work from home, we can supply and deploy HP technologies direct to their location," explains Mark Kennell, Solutions Leader, End User Computing at Computacenter. "Plus, our preconfiguration services ensure that devices are ready to use as soon as possible."

# 3

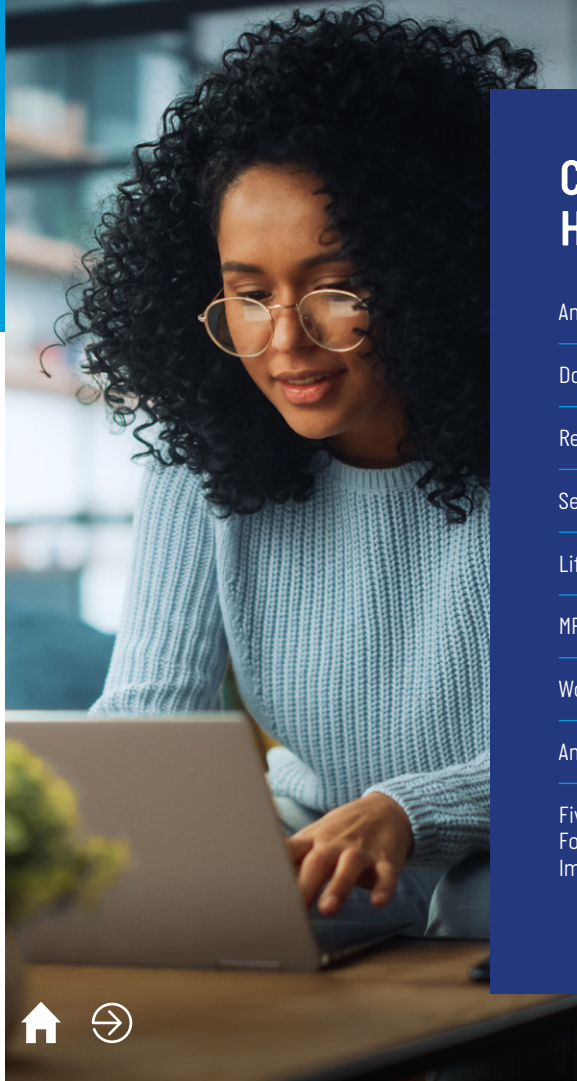

## MEET FINANCIAL GOALS WITH SERVICES DESIGNED FOR TODAY'S WORKPLACES

Computacenter's services around HP technologies are proven and cost-effective. We offer support, maintenance and managed services for all HP devices, with self-service capabilities, remote control and automated workflows all helping to enhance efficiency and decrease user downtime.

We offer transactional and managed print services that help organisations safeguard security and improve control of their print estate, and working with specialist subsidiary RDC, we can redeploy, re-market and recycle HP devices to maximise their residual value.

With the increased popularity of utility-based services, Computacenter also offers flexible financing with its Desktop-as-a-Service (DaaS) offering and Pay-as-you-go-Refresh service.

"At Computacenter, we're continuously developing innovative new services and offerings in response to customer needs," says Mark Kennell. "HP's best-in-class technologies will remain core to our workplace solutions as we help customers navigate current and future challenges."
